BlueCard
Incident Commander Train-the-Trainer Program

Benefits of the Blue Card Program:
Standardizes hazard zone operations across the entire organization.
Creates safer incident operations.
Creates better incident outcomes - more rapid "all clears" & reduced fire damage.
Move from a test based promotional exam to a certification based process.

Maximizes the effective use of resources.
The Blue Card Program has been designed around NFPA Standards 1561 and the NFPA NIMS pro-quals 1026.
The Blue Card Program is NIMS complaint for type 4 & 5 operations.
Over the last 20+ years the Blue Card IMS has also been used to manage hazard zone work in NIMS type 1-3 incidents.

The Blue Card train the trainer program offers FD's with incredible, turn key resources that will help implement a comprehensive, local command training program at a fraction of the costs it would take a FD to produce the material/program themselves. It will also provide departments with a core group of instructors/evaluators that are now trained and equipped to deliver the Blue Card evaluation and certification process to the members of their own department or region. These new instructors can also deliver the train the trainer program to other members in their department or region, creating a larger base of instructors/evaluators.

Instructors must have at least 5 years of fire service experience. The ideal Blue Card instructor would be a Department Training Officer, Response Chief or Ranking Operations Chief (Shift Commander, District Chief, etc.). All attendees must complete the 50-hour online Blue Card class prior to the Train-the-Trainer program.
Students will be evaluated on the following command/IMT positions:
- •Initial On-Scene Officer
- •Incident Commander (IC)
- •Incident Management Team (IMT) Member
- •Sector/Division/Group Supervisor/Safety Officer

The Blue Card Instructor package includes:
The 50-hour Blue Card online training program
6 days of command training
Functions of Command Review PowerPoint program & Instructor's Guide
Communications overview PowerPoint program & Instructor's Guide
Tactical template PowerPoint programs & Instructor's Guides for the 5 core building types:
1. *Residential*
2. *Multi-unit residential*
3. *Strip malls*
4. *Commercial*
5. *Large commercial (Big Box)*

2 each (for a total of 10), simulations for the 5 core building types. Each simulation comes with a review PowerPoint program, an Instructor's Guide and student evaluation sheets customized to each simulation. Each simulation is created with Fire Studio version 4 and has views of each key tactical position for group simulations.

The following DVDs are also included in the media package:
The 9 disk Fire Command DVD package
The 3 disk Critical Fireground Factors set – includes New Residential Roof Systems, Fire Behavior in Commercial Buildings & Size Up and Risk Management
Managing Mayday series. Includes – Tarver fire, CTC mayday drills & 2006 mayday drills
Sector/Division/Group Ops DVD
ON Deck DVD

Each Instructor leaves with enough curriculm for 3-years of training. The Blue Card system is over 35 years old and has been used to safely & effectively manage millions of incidents.

Dates:
December 7-12, 2009

Contact Info:
