ABOUT THE EVENT . . .

The Lt. Brad Hutcherson Memorial Fire School was an idea that was first thought of in the middle of Brad's funeral service. The idea quickly evolved into much more as it took on a personality of its own. The intent of this event is to accomplish four (4) things:

- 1) Remember Lt. Brad Hutcherson and honor his memory
- 2) Fundraising event for the LTBHMFS Education Assistance Fund
- 3) Provide outstanding training at an affordable price to area fire service members
- 4) Hold an event in Brad's name to benefit his friends & co-workers through training and healing.

This one day event will hold several different opportunities for those that attend. There will be several different courses offered with very respected and experienced Instructors teaching in each area. All are certified and will present participants with a certificate at the completion of each course. There will be something for everyone regardless of age, rank, years of service, etc. There will be classroom sessions, hands-on drills, and table top scenarios to increase your knowledge, skills, and abilities.

Course fees will be kept to a minimum in case members have to pay their own way. You will not find better training for the price, ANYWHERE.

There will also be other fundraising activities throughout the day. We plan to raffle off several fire service items and sell a Memorial t-shirt. This t-shirt will honor Brad as well as commemorate this special event in his memory. We will also have numerous door prizes to give a way.

ALL PROCEEDS from this event will go to the Lt. Brad Hutcherson Memorial Fire School. This includes funds raised by class fees, the raffle, and the memorial t-shirt. To show their love for the fire service and their commitment to this event, all Instructors are teaching for free.

Lunch and rehab will also be provided free of charge to all participants.

Pre-paid registration is a must, as all classes have limited seating. Our hope is to fill each class to maximize the total experience for all.

Lt. Brad Hutcherson was a special individual that touched many lives. We think this Fire School would make him proud and honor his contributions to the Fire Service. We hope you can join us for this special event to better firefighters through progressive training, help heal the hurt from Brad's loss, and raise money for his fund so he can continue to make an impact.

3RD ANNUAL **LT. BRAD HUTCHERSON** **MEMORIAL** **FIRE SCHOOL**

COURSE DESCRIPTIONS

☐ Fire Ground Assessment - Seeing the Big Picture

4 Hour Class with Maximum of 24 Students

Instructors: Troy Webster, Captain (Florence, KY F.D.)

Assessing the fire ground upon arrival is critical. In fact, the decisions made from the initial assessment gathered can mean the difference between life and death. This 4-hour program will discuss how to make more informed decisions based on the situation at hand. This program will take a common sense approach to scene size-up and explore ways in making the first arriving officer better informed.

☐ **Reel Leadership**

4 Hour Class with Maximum of 24 Students

Instructor: Troy Webster, Captain (Florence, KY F.D.)

Lights, cameras, action! This 4-hour educational, highly active program is designed to provide a wide selection of Hollywood movies that will support and enhance real-world leadership lessons used in today's fire service. These films will not only entertain but also provide a way to teach leadership at all levels in the process of a firefighter's career. Through this unique way of learning, we will share concepts, create ideas, and confirm facts, reinforced by action and drama of the big screen and incorporating various activities. Lots of people are talking about leadership these days and there is a good reason, it's the most important skill that a fire officer or chief can possess, when the folks in leadership positions have the Right Stuff. Don't miss out on this educational and entertaining opportunity!

- **R.I.T.: Truth or Consequences**

7 Hour Class with Maximum of 20 Students

Instructor: Mark Gregory, Lieutenant (F.D.N.Y., Tower Ladder 111)

Learn from Instructors that have been involved in actual Firefighter Removals and have helped to establish successful R.I.T. Programs which techniques can help expedite the removal of a firefighter in need of assistance. Proactive Firefighting rather than Reactive Firefighting is emphasized during this course. This class will consist of a PowerPoint presentation along with hands-on skills covering various drags, carries, high point rescue techniques, and airway management of a downed firefighter. NFPA 1983 compliant turnout gear, including S.C.B.A., is required.

☐ **S.C.B.A.**

7 Hour Class with Maximum of 24 Students

Instructor: Joe Polenzani, Captain (Franklin, TN F.D.)

Whether attacking a fire, ventilating a roof, or performing overhaul, firefighters rely on their SCBA for protection from smoke and toxic gasses. Failure to master this essential piece of equipment can result in the failure of many fireground operations, endangering both the wearer and other firefighters. This hands-on class is designed to give firefighters the confidence to successfully deal with SCBA emergencies and other challenging situations that they may encounter on the fireground. Topics covered include moving through and disentangling from wires, reduced-profile maneuvers, air management, handling SCBA malfunctions, and self-rescue techniques. The class uses a series of realistic evolutions, which provide both an opportunity to learn new skills and a personal evaluation tool that students can use to gauge their own level of competence. NFPA 1983 compliant turnout gear, including S.C.B.A., is required. A spare cylinder is recommended.
